

## WHAT'S NEXT?

### 1. Indiana 811: DIGS

- a. We will contact Indiana 811 to mark underground utilities about one week prior to anticipated installation. This free, public service is required by law before digging on your property. Use the white flags(s) provided at purchase to mark the desired location(s) for your planting(s) within 48 hours of purchase.
- b. After this service is complete, you may need to adjust your desired planting location to avoid underground utilities. Trees should be a minimum of 3-6 feet from marked utilities. All other plants should be a minimum of 24 inches from marked utilities.

### 2. Private Lines

- a. Private lines (irrigation, lighting, or invisible/pet fencing) are NOT marked by 811. Please contact your system provider or locate the lines to ensure accurate installation. Wasson is NOT responsible for privately owned lines that have not been properly located and marked.

### 3. Permits

- a. Ensure you have all proper permission and/or permits from any Homeowners Association and/or municipality when required. For example, the City of Fishers requires homeowners to apply for a permit for planting a street tree.

### 4. Installation

- a. You will receive a call from Wasson within 24 hours of anticipated install date.
  - i. You do not need to be present for Wasson to complete the installation. Severe weather and other factors may produce delays beyond our control. Declining our anticipated install date may delay your planting up to a few weeks.

### 5. Communication

Your next contact from us will be the day prior to installation. Installation may be 2 - 8 weeks from the purchase date and varies based on current workload.

### 6. Still have questions?

## WHAT'S INCLUDED?

An installation by Wasson includes the following services:

1. Professional installation procedures
2. Root Stimulator applied to the root system at time of planting
3. Layer of mulch covering the base of the plant (complimentary mulch ring, not a continuous bed).
4. Professionally supported with wooden tree stake (if needed)

Please make sure to follow the watering instructions enclosed herewith. Your new plant will need extra care through the next year, and subsequent years during periods of drought and heat.

## COPY OF WHAT YOU SIGNED ON QUESTIONNAIRE:

Wasson strives to schedule installations as quickly as possible by building routes with other installations in the area. Homeowners will receive a call the day before installation to confirm and are NOT required or requested to be home. Plants will be installed where individually noted flags are placed by homeowner UNLESS flags are placed on or near lines marked by locates. In this case, Wasson reserves the right to move the plant(s) off the marked line in the direction best seen fit at our discretion. Homeowner acknowledges if Wasson is unable to install the plants due to missing flags, inappropriately placed flags, or inaccurate information (unground/removed stumps or other unmentioned obstacles), a secondary delivery will be incurred and MUST be paid before rescheduling an installation. Homeowner agrees to read the attached install packet for instructions and additional details.
